Baskets	None	None	none		
Walls					
Floors					

- Continued work in Square B2A
 - After cleaning, measurements and photography, valuable architectural fragments were placed in the sarcophagus. The covering stones were put in their original position. Then cloth was placed over the tomb.
 - The center part of the chancel was refilled with earth to the level of F516.
 - The stone base and the opus sectile flooring were replaced north of the tomb as were the pieces of opus sectile south of the tomb
- Continued work in Square C2
 - Conservation of the edges of the mosaic remnants continued.
- Continued work in C1
 - Conservation of the edges of the mosaic remnants continued.
